How Do You Confirm Your Passkey on Coinbase? {Get Instant Help}

Confirming your passkey+1-888-394-2349 [USA/OTA] on Coinbase is a security step that verifies you are the person trying to access your account.+1-888-394-2349 [USA/OTA] A passkey+1-888-394-2349 [USA/OTA] uses your device's built-in authentication system, such as Face ID, Touch ID, fingerprint recognition,+1-888-394-2349 [USA/OTA] or a device PIN, instead of relying only on+1-888-394-2349 [USA/OTA] a traditional password. When you choose to use a passkey during login or account +1-888-394-2349 [USA/OTA] security setup,+1-888-394-2349 [USA/OTA] Coinbase sends a verification request to your device. You confirm the passkey+1-888-394-2349 [USA/OTA] by approving the request using your device's security method. This may involve scanning your+1-888-394-2349 [USA/OTA] fingerprint, looking at your+1-888-394-2349 [USA/OTA] device camera for facial recognition, or entering your device PIN.+1-888-394-2349 [USA/OTA] Once your device successfully verifies your identity+1-888-394-2349 [USA/OTA], the passkey authentication is completed, and Coinbase allows access to your account or+1-888-394-2349 [USA/OTA] completes the requested security action.

If+1-888-394-2349 [USA/OTA] your Coinbase passkey confirmation is not working, first check that your device supports+1-888-394-2349 [USA/OTA] passkeys and that your screen lock,+1-888-394-2349 [USA/OTA] biometric authentication, or PIN is properly configured. Make sure you are using the same device, browser+1-888-394-2349 [USA/OTA], or account ecosystem where your passkey was created.+1-888-394-2349 [USA/OTA] Updating the Coinbase app+1-888-394-2349 [USA/OTA], restarting your device, and checking your internet connection may also help resolve temporary issues.+1-888-394-2349 [USA/OTA] If you+1-888-394-2349 [USA/OTA] recently changed devices, removed your passkey, or cannot access the device where it was+1-888-394-2349 [USA/OTA] saved, you may need to use+1-888-394-2349 [USA/OTA] another available login method and create a new passkey. For account security,+1-888-394-2349 [USA/OTA] never approve a passkey request that you did not initiate, and never share your passwords,+1-888-394-2349 [USA/OTA] verification codes+1-888-394-2349 [USA/OTA], or recovery information with anyone claiming to be Coinbase Support.

Related FAQs

1. How do I confirm my Coinbase passkey during login?

When+1-888-394-2349 [USA/OTA] Coinbase asks for your passkey, select the passkey login option and approve the+1-888-394-2349 [USA/OTA] request using your device's authentication+1-888-394-2349 [USA/OTA] method, such as Face ID, fingerprint, or PIN. Once verified, you will be signed in.

2. Why is my Coinbase passkey confirmation failing?
